- Personalised trim
- Polyethylene rot-proof floor

Other possible  
internal fittings  
available on request

Large storage  
space

## The drawbacks of straight transportation

Some horses dislike being transported facing in the direction of travel. The confined space upsets them. They try to push the sides away by leaning on the partition.

## Why choose diagonal transportation ?

### MORE SPACE MORE COMFORT

- Diagonal transportation allows the horse to **balance itself** by spreading its hind legs.
- The horse **comfortably** handles any braking, turns, roundabouts...

## Load/Unload easily WITHOUT A RAMP

### > The Fautras solution

- The step up is protected by a rubber strip which increases **safety** when loading and unloading.
- The **FAUTRASTECH** flexible partition pivots **completely** thus leaving maximum possible space for ease of loading and unloading.
- The doors **channel** the horses into the trailer.

## Ease of use...

### > Front exit gives :

- Easy rider to horse access
- Good ventilation at a standstill
- Forward unloading of horses

## More convenient...

### > Large tack area at the front offering :

- Large storage *space*
- Easy access to the equipment thanks to a large door

Model shown with Hitching Rail  
(See options)

## FAUTRAS equipment combining... SECURITY and COMFORT

- Flexible pivoting head partition.
  - **FAUTRAS TECH partition** : flexible, pivoting, removable by a single person. (award-winning innovation at the Salon du Cheval in Paris) (see below)
  - Comfortable padding.
  - Spare wheel with bracket (inside or outside).
  - Superior quality, non-slip matting over rot-proof floor.
- Simple and easy to use.
  - Maintenance-free, independent wheel suspension.
  - Safety roll bars.
  - Internal and external tie-rings.
  - Automatic jockey wheel.
  - Interior light.
  - Integrated lockable ball hitch.

### > FAUTRAS TECH flexible pivoting partition *Fitted as standard*

#### > Horses no longer become stressed with the new flexible Fautras partition.

- They no longer seek to push it away and no longer feel trapped.
- Better able to stabilise themselves, they can comfortably handle turns and roundabouts.

- Once the first horse has unloaded forwards <sup>2</sup>, the partition pivots against the wall of the tack area <sup>3</sup>.

- The head partition folds back towards the outside <sup>3</sup> <sup>4</sup> to allow the forward exit of the 2<sup>nd</sup> horse.

- A self-blocking system keeps the partition open to the outside.

### More efficient, more comfortable...

- For improved security, particular care is taken to optimise weight distribution.

### > Ventilation shutters adjustable in 3 positions

- Simple and easy to use.
- Allows for regulation of ventilation.

## CHOICE OF 6 COLOURS

White

Pearl Grey

Ivory

Navy Blue

Burgundy

Green

> Personalised trim
