- Sliding windows with protective grilles • Integrated lockable ball hitch • Interior light
- FAUTRAS TECH™ partition with self blocking system
- Polyethylene rot-proof floor
- Choice of 7 colours • Personalised trim

## The drawbacks of straight transportation

Some horses dislike being transported facing in the direction of travel. The confined space upsets them. They try to push the sides away by leaning on the partition.

## Why choose diagonal transportation ?

### MORE SPACE MORE COMFORT

- Diagonal transportation allows the horse **to balance itself** by spreading its hind legs.
- The horse **comfortably** handles any braking, turns, roundabouts...

## Load/Unload easily WITHOUT A BACK RAMP

### > The Fautras solution

- The step up is protected by a rubber strip which increases **safety** when loading and unloading.
- The **FAUTRAS TECH™** flexible partition pivots **completely** thus leaving maximum possible space for ease of loading and unloading.
- The doors **channel** the horses into the trailer.

## Ease of use...

### > Front exit gives :

- Easy rider to horse **access**
- **Good ventilation** at a standstill
- **Forward** unloading of horses

Model shown with spacing rail  
(See options)

## More convenient...

### > Large tack area at the front offering :

- Large storage **space**
- **Easy access** to the equipment thanks to a **large door**

See price and equipment options list

## FAUTRAS equipment combining... SECURITY and COMFORT

- Flexible pivoting head partition.
- **FAUTRAS TECH™** partition : flexible, pivoting, removable by a single person. (award-winning innovation at the Salon du Cheval in Paris) (see below)
- Partition **self-blocking** system
- Spare wheel with bracket (inside or outside).
- **Superior quality**, non-slip matting over **rot-proof** floor.
- **Simple and easy** to use.
- **Maintenance-free**, independent wheel suspension.
- **Safety roll bars**.
- **Internal and external tie-rings**.
- Interior light.
- **Integrated lockable ball hitch**.

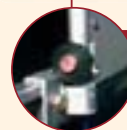

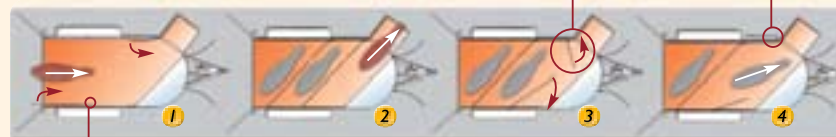

### > FAUTRAS TECH™ flexible pivoting partition *Fitted as standard*

### > Horses no longer become stressed with the new flexible FAUTRAS TECH™ partition.

- They no longer seek to **push it away** and no longer feel trapped.
- **Better able to stabilise themselves**, they can comfortably handle turns and roundabouts.

- Once the first horse has unloaded forwards ②, the partition pivots against the wall of the tack area ③.
- The head partition folds back towards the outside ③ + ④ to allow the forward exit of the following horses.

• A **self-blocking** system keeps the partition open to the outside.

## More efficient, more comfortable...

- For improved security, particular care is taken to optimise **weight distribution**.

### > Ventilation shutters adjustable in 3 positions

- **Simple and easy** to use.
- Allows for regulation of ventilation.
